**Blight Recertification  
for the Area Generally Bounded by  
30<sup>th</sup> Street, Girard Avenue,  
33<sup>rd</sup> Street and Oxford Street**

July 2002

INTRODUCTION

This report presents an evaluation of blight in an area of Lower North Philadelphia in the vicinity of Girard Avenue & 30<sup>th</sup> Street. The blight certification boundaries are shown on the map on page 2: the generalized boundaries are 30<sup>th</sup> St. on the east, Girard Ave. on the south, 33<sup>rd</sup> St. on the west and Oxford St. and the AMTRAK rail line on the north. This is a portion of the neighborhood known as Brewerytown.

The blight recertification boundaries are entirely within the North Philadelphia Redevelopment Area as certified on November 26, 1968, with subsequent amendments. The 1968 certification is superseded only within the above mentioned boundaries by this recertification.

The recertification study reviews existing conditions in relation to seven criteria used to determine whether blight exists in an area. The criteria are set forth in Pennsylvania Urban Redevelopment Law, which stipulates that only one of these criteria must be met to make a finding of blight in an area. The law also states that blighted conditions need not be evident throughout the area under study. The fact that individual properties are free from blight does not make the finding of blight arbitrary, according to the law, because comprehensive planning requires that areas be considered in their entirety, and not in their unseverable parts.

This report cites specific examples of the conditions listed in two of the criteria. Blight does exist in the area.

CRITERIA

Pennsylvania Urban Redevelopment Law contains the following criteria for establishing the presence of blight in a particular area:

1. Unsafe, unsanitary, inadequate or overcrowded conditions
2. Inadequate planning
3. Excessive land coverage
4. Lack of proper light, air and open space
5. Faulty street and lot layout
6. Defective design and arrangement of buildings
7. Economically or socially undesirable land use

## ANALYSIS

The following section describes the characteristics of blight evident in the area generally bounded by 30th Street, Girard Avenue, Oxford Street and 33rd Street.

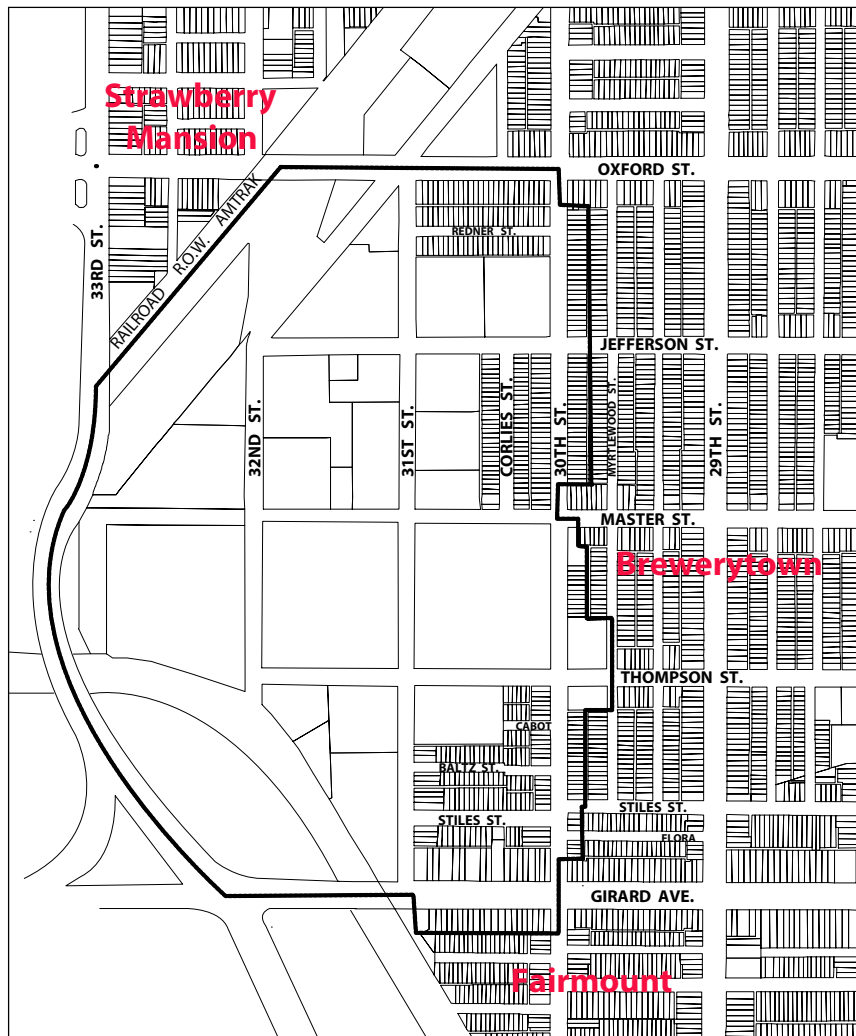

### 1. Unsafe, Unsanitary, Inadequate or Overcrowded Conditions

Evidence of this criterion is presented in the following categories:

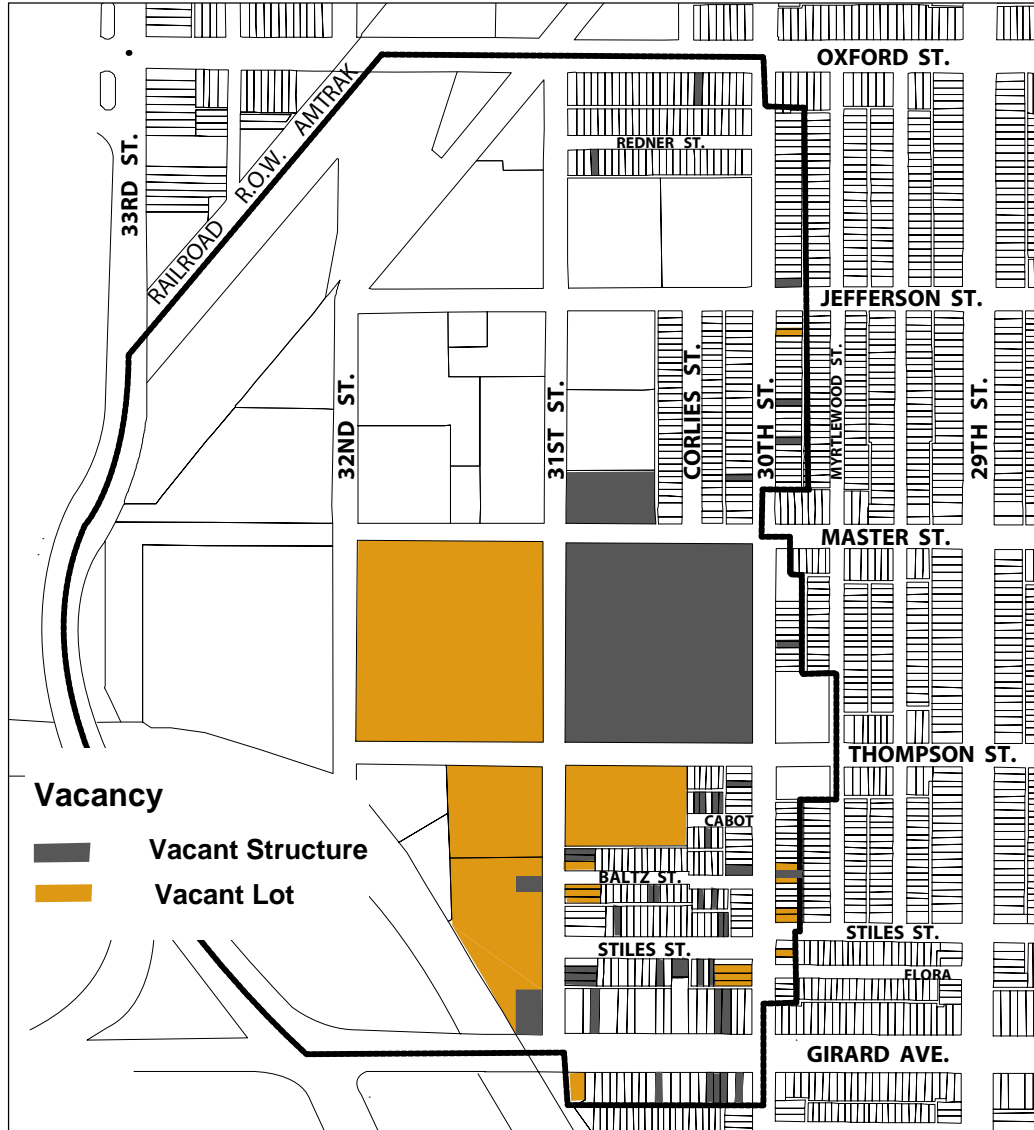

- the presence of a significant number of vacant properties
- the existence of numerous vacant, trash-strewn lots

Vacant Properties: The area contains 353 separately titled properties. Recent field surveys indicate that 64, or over 18% of the properties are vacant (see “Vacancy” map, page 3). Included among the vacant properties are 46 vacant structures and 18 vacant lots.

Vacant, Trash-Strewn Lots: Unsafe and unsanitary conditions were also documented through the observation of 18 vacant lots, most of which are uncared for and littered with trash.

The study area (boundary in black, above) is located in the Brewertown neighborhood between Strawberry Mansion to the north and Fairmount to the south.

2. Economically or Socially Undesirable Land Use

There is substantial evidence of economically and socially undesirable land use in this area. This criterion is primarily met within the study area by virtue of the 64 vacant structures and vacant lots that were counted during recent field surveys. Tax delinquency and relatively low housing values provide additional evidence of economically undesirable land use.

Vacant structures and lots are economically undesirable inasmuch as city-wide experience has demonstrated that vacant properties have an increased likelihood of being long-term tax-delinquent. Residential property abandonment deprives the neighborhood, the city and the region of purchasing power, which erodes the local economy and results in reduced sales tax revenue to government.

Vacant structures and lots are socially undesirable for a number of reasons: they downgrade the overall physical environment of the neighborhood, they reduce the area's vitality, and they increase the potential for vandalism, arson, and other crime. The increased threat of arson is a hazard which affects both vacant buildings and adjoining, occupied structures in the neighborhood. Furthermore, many of the vacant

buildings in this area are structurally deteriorated and therefore they pose a danger to children, passersby and people who might be trespassing on the property.

Tax delinquency represents economically undesirable land use. When real estate tax is not paid, privately-owned properties are benefiting from municipal services without contributing to the revenue base that pays for those services. Within this Recertification Area, 100 properties (over 28% of the privately owned properties) have been found to be tax delinquent for two or more years. Therefore, it is apparent that the area currently provides a low economic return to the City.

**CONCLUSION**

In the area generally bounded by 30th Street, Girard Avenue, 33<sup>rd</sup> Street and Oxford Street, existing conditions are consistent with two (2) of the criteria necessary to produce a finding of blight under Pennsylvania Redevelopment law. Those criteria are:

1. Unsafe, unsanitary, inadequate or overcrowded conditions
2. Economically or socially undesirable land use

The preceding analysis has demonstrated that these two (2) criteria for establishing the presence of blight are satisfied and the area is eligible for recertification.

**RESOLUTION**

WHEREAS, Pennsylvania Urban Redevelopment Law, Act of May 24, 1945 (P.L. 991) as amended, authorizes the Philadelphia City Planning Commission to certify as blighted specific areas which may then, in whole or in part, be made the subject of redevelopment proposals formulated by the Redevelopment Authority in accordance with said Act, and

WHEREAS, on November 26, 1968, the Philadelphia City Planning Commission certified the area bounded on the north by Lehigh Avenue, on the east by Front Street, on the south by Spring Garden Street and on the west by Fairmount Park as exhibiting characteristics of blight under terms of said Act, and

WHEREAS, after substantial review and study, the Commission's staff has presented a report concluding that the area generally bounded by 30th Street, Girard Avenue, 33rd Street and Oxford Street continues to exhibit characteristics of blight as defined by the Act, and

WHEREAS, the Planning Commission concurs with the findings and conclusions set forth in said staff report,

NOW THEREFORE on this seventeenth day of July 2002, the Philadelphia City Planning Commission hereby finds, based upon its staff report dated July 2002 that the area generally bounded by 30th Street, Girard Avenue, 33rd Street and Oxford Street exhibits the following characteristics of blight as established by Pennsylvania Urban Redevelopment Law:

1. Unsafe, unsanitary, inadequate or overcrowded conditions
2. Economically or socially undesirable land use

and hereby recertifies the above described area as blighted under the terms and provisions of the said Act.
